III. MAINTENANCE

SPARK PLUGS

RECOMMENDED SPARK PLUG

NEW	For cold climate below 5°C (41°F)		Standard		For extending high speed riding	
	ND	NGK	ND	NGK	ND	NGK
	X22ESR -U	DR7ES	X24ESR -U	DR8ES -L	X27ESR -U	DR8ES

Disconnect the spark plug caps.
Clean any dirt from around the spark plug bases.
Remove and discard the spark plugs.

Measure the new spark plug gaps using a wire-type feeler gauge.

**SPARK PLUG GAP: 0.6–0.7 mm
(0.024–0.028 in)**

Adjust by bending the side electrode carefully.

With the plug washer attached, thread the new spark plugs in by hand to prevent cross-threading.

Tighten the spark plugs another 1/2 turn with a spark plug wrench to compress the plug washer.

Reinstall the spark plug caps.

CAUTION

- The spark plug must be securely tightened. An improperly tightened plug can become very hot and possibly damage the engine.
- Never use a spark plug with an improper heat range.

FUEL STRAINER

Turn the fuel valve OFF.

Remove the fuel cup, O-ring and filter screen, draining the gasoline into a suitable container.

WARNING

Gasoline is flammable and is explosive under certain conditions. Do not smoke or allow flames or sparks near the equipment while draining fuel.

Wash the cup and filter screen in clean non-flammable or high flash point solvent.

Reinstall the screen securely, aligning the index marks on the fuel valve body and filter screen.

Install a new O-ring into the fuel valve body.

Reinstall the fuel cup, making sure the new O-ring is in place. Hand tighten the cup and then torque it to specification.

TORQUE: 3–5 N·m (0.3–0.5 kg-m, 2–4 ft-lb)

NOTE

Do not overtighten the fuel cup.

After installing, turn the fuel valve ON and check that there are no fuel leaks.

ENGINE OIL

Recommended oil:

NEW

- Use HONDA 4-STROKE OIL or equivalent.
- API service classification — SE or SF.
- Viscosity — SAE 10W-40.
- Other oil viscosities may be used when the average temperature in your riding area is within the indicated range.

VI. FRAME

SEAT REMOVAL

Remove the socket bolt caps.
 Remove the four socket bolts from the grab rail.
 Remove the grab rail.
 Remove the grab rail lock nuts.
 Remove the seat nuts and pull the seat backwards to remove it.

When reinstalling the seat, align the grooves with the lugs and push the seat firmly into place.
 Reinstall the locknuts, the grab rail and the socket bolts and caps. Lift the seat to make sure the latches are secure.

REAR SUSPENSION

SHOCK ABSORBER ASSEMBLY

NOTE

Apply a multipurpose grease high in molybdenum content, as follows:

- MOLYKOTE G PASTE manufactured by Dow Corning U.S.A.
- Other lubricants of equivalent quality.
